Our Campus

Pepperdine's Malibu setting offers unparalleled natural beauty from every location and facility. Our Mediterranean revival architecture, designed with subtlety in mind, aims to keep the focus on the surrounding ocean and mountains. Enjoy the view; we hope you brought a camera.

BACKGROUND

George Pepperdine founded Pepperdine University to foster an institution dedicated to promoting the highest standards of academic excellence and Christian values. Our founder was never one to play it safe. With an investment of only \$5 in postage, George Pepperdine started the Western Auto Supply Company in 1909. Twenty-eight years later, despite the scope of the Great Depression, he founded George Pepperdine College at its original campus in South Los Angeles.

In 1971 Pepperdine was reorganized as a university after the School of Law was established and the departments of Business and Education were labeled as separate schools. A year later, Pepperdine moved to its present 830-acre Malibu campus, which is consistently recognized as one of the most beautiful in the nation. While a close drive to all that Los Angeles has to offer, the Malibu campus provides students with a safe, small-town atmosphere where they can thrive academically and intellectually. We hope this tour will inform you of the many ways our students are strengthened for lives of purpose, service, and leadership, as well as how they use and enjoy our Malibu campus.
