Description: An interdisciplinary study of the structure, functions, needs, and problems of urban areas. Analysis of the political, economic, sociological, and psychological aspects of the city, which is viewed as a microcosm of urbanized mass society. Two required, all-day field trips, one to Los Angeles and a second to Tijuana, Mexico, are planned.

Objectives: This class aims to increase students’ understanding of the historical development, economics, and politics of three representative cities: Los Angeles (California), Tijuana (Baja California, México), and Paris (France). The course should also help explain the causes of migration, crime, poverty, homelessness, ethnic conflict, and segregation. Finally, the class should stimulate participants to think about the city as an opportunity for service.

Requirements: Successful completion of this course will require reading the assigned texts when assigned, writing one 12-15 page research paper (30% of grade; due November 30), performing creditably on the midterm (25% of grade) and final (35% of grade) exams, and attending class regularly and taking an active part in class discussions (10% of grade). The midterm will be given in class on Wednesday, October 10, and the final will take place on Tuesday, December 11, from 1:30 p.m. to 4:00 p.m. In addition, students will participate in two all-day field trips, tentatively scheduled for October 17 and November 14.

Students with documented disabilities (physical, learning, or psychological) requiring accommodations to participate in class activities or meet course requirements should contact the Disabilities Services Office (TCC 264, 506-6500) as soon as possible. All discussions will remain confidential. Please visit www.pepperdine.edu/disabilityservices/ for additional information. Students needing to be absent during a religious holiday should also notify the instructor beforehand.

Academic dishonesty will not be tolerated! Examples include writing notes on one=s extremities and consulting said notes during a closed-book exam, forging the professor=s signature, down-loading term papers from the Internet, copying a paper from a previous student, hiring a graduate student to write your term paper for you, and submitting the same term paper for two classes without having previously obtained the permission of both instructors. If you are caught cheating in this course, I will do my best to see that you at least receive an F for the course and are referred to the Academic Integrity Committee for disciplinary action. In short, don=t even think about it!
A student requesting a grade change on substantive grounds (e.g., the number of points earned for a particular answer on an exam; substantive grounds do not include errors in adding up the total number of points for an exam) must submit her or his request to me in writing within one week of the date I returned the graded assignment to her or him. My response will be in writing and is subject to review by and carbon-copying to the chair of the Social Science Division.
